

Volunteer's Instruction

1. Evaluation of bots is performed via Telegram messaging service.
2. If you have no Telegram account please register:
 - a. for Android users -
<https://play.google.com/store/apps/details?id=org.telegram.messenger&hl=en>;
;
 - b. for iPhone users -
<https://itunes.apple.com/us/app/telegram-messenger/id686449807?mt=8>;
 - c. for web users - <https://web.telegram.org>.
3. After you have your Telegram account created, login in Telegram and add **@ConvaiBot** - this is official bot for our competition. [More details](#).
4. To start a dialog type or choose a '/start' command .
5. You will be connected to a peer or, if no peer is available at the moment, you'll receive the message from @ConvaiBot "Please wait for you peer."
6. Peer might be a bot or another human evaluator
7. After you were connected with your peer you will receive a starting message - a passage or two from a Wikipedia article.
8. Your task is to discuss the content of a presented passage with the peer and score her/his replies.
9. Please score every utterance of your peer with a 'thumb UP' button if you like it, and 'thumb DOWN' button in the opposite case.
10. To finish the conversation type or choose a command "/end".
11. When the conversation is finished, you will receive a request from @ConvaiBot to score the overall quality of the dialog along three dimensions:
 - a. quality - how much are you satisfied with the whole conversation?
 - b. breadth - in your opinion was a topic discussed thoroughly or just from one side?
 - c. engagement - was it interesting to participate in this conversation?
12. If your peer ends the dialog before you, you will also receive a scoring request from @ConvaiBot
13. Your conversations with a peer will be recorded for further use. By starting a chat you give permission for your anonymised conversation data to be released publicly under [Apache License Version 2.0](#).
